Designed to support enterprise-class environments demanding the utmost in productivity and durability, the imageRUNNER 7105/7095/7086 devices provide versatility in both functionality and hardware configuration.

The imageRUNNER 7105/7095 devices are perfectly suited for central reproduction departments, print-for-pay establishments, print-on-demand applications, and large corporate offices where rapid document capture and production are required. The imageRUNNER 7086 device offers the speed and versatility to serve as a complete document publishing and communications hub device for busy corporate departments. And best of all, each model is Internet-ready, so you can be assured of the tightest possible integration and device control across your entire corporate network.
PRODUCTIVITY
While their output speeds are impressive, it’s what Canon has done to each system’s internal design that’s truly inspiring. Every model features dual Canon custom processor technology to handle sophisticated applications with incredible speed. With available support for actual 1200 x 1200 dpi* print resolution and Canon’s exclusive Fine Character and Edge Technology (FCET), you can count on outstanding image quality on every page.

RELIABILITY
Each imageRUNNER 7105/7095/7086 device is infused with the strength and power needed to withstand the daily punishment of production environments. A sturdy, reinforced frame offers rock-solid stability, while multifeed detection technology stands guard against double-feeds and lost productivity. These improvements, along with high-durability parts and components, add up to superior reliability for environments producing huge volumes of pages every month.

DURABILITY
Set new expectations for uptime and maintenance requirements. A high-capacity toner bottle design provides quick and clean replacement and can be changed while the machine is running for non-stop productivity. And with a long-lasting 6,000,000-impression Amorphous-Silicon (A-Si) drum, the imageRUNNER 7105/7095/7086 devices deliver low operating costs and less downtime.

* Only available with certain page description languages.

CHALLENGE YOUR DOCUMENT PRODUCTION CAPABILITIES
The imageRUNNER 7105, imageRUNNER 7095, and imageRUNNER 7086 devices will redefine your expectations for total in-house black-and-white document production.

Job programming is a breeze, thanks to an oversized color LCD user interface panel that clearly displays available modes and functions. From the desktop, intuitively designed drivers and utilities guide connected users through jobs with point-and-click simplicity.

A sturdy engine design provides maximum durability
Challenge Your System
Versatility Expectations

The Paper Folding Unit-D1
Z-folds 11” x 17” pages into document sets with a finished 8-1/2” x 11” size.

Attach the Booklet Trimmer-C1 to the Saddle Finisher-V2 to trim the open end of booklets.

The Professional Puncher-A1* offers a number of optional hole-punch tools to ready documents for advanced binding applications.

Install the Document Insertion Unit-C1 on top of the Finisher Units to feed booklet covers into job streams.

Add the Perfect Binder-A1* to produce perfectly bound and trimmed books with wraparound covers.

The Finisher-V1 or Saddle Finisher-V2 provides the collating, stapling, saddle-stitching and optional punching flexibility required for busy production environments.

The Finisher-V1 or Saddle Finisher-V2 provides the collating, stapling, saddle-stitching and optional punching flexibility required for busy production environments.

*The Professional Puncher-A1 cannot be installed simultaneously with the Perfect Binder-A1. The Professional Puncher-A1 and the Puncher Unit-V1 can be installed simultaneously in the same configuration.

Note: Some accessories require additional equipment or may be prerequisites for other options. Check with your local Authorized Canon Dealer for details.
The imageRUNNER 7105, imageRUNNER 7095, and imageRUNNER 7086 devices are modular, allowing you to mix and match the paper supply and advanced finishing accessories you need to meet your diverse publishing requirements and drive productivity to new levels.

- The High-Capacity Stacker-A1 neatly stacks sheets for long periods of unattended operation. Includes a removable dolly.
- The standard Duplexing Automatic Document Feeder makes quick work of complex originals.
- Add the Paper Deck-W1 or Paper Deck-X1 to raise system paper capacity to a maximum of 7,650 sheets.

Stapled Output
Canon imageRUNNER 7105/7095/7086 devices can be configured with three different print controller options to keep pace with demanding departments and page-churning production environments.

**CANON MULTI-PDL PRINTER KIT**
The optional Multi-PDL Printer Kit-H2 is an embedded controller that provides support for PCL and PostScript® 3™ emulation, plus Canon’s proprietary UFR II (Ultra Fast Rendering) technology for exceptional printing performance in both Windows® and Macintosh® networks. Canon’s consistent driver architecture provides intuitive print settings and dynamic device information, such as configuration and available media.

The imageRUNNER 7105/7095/7086 devices support Job Definition Format (JDF) for enhanced print workflows in production environments. When used together with Canon’s ImageWARE™ Prepress Manager and ImageWARE Print Job Manager, documents can be submitted as a JDF file format with customized pre-press, printing or finishing settings. These JDF files can be printed or submitted into the Hold Queue of the device and then operators can easily manage, Preview, Job Ticket Edit, and Sample Print multiple queued jobs from the device.

**imagePASS-S2**
The optional imagePASS-S2 external print server is a robust solution for light-production environments, and supports genuine Adobe® PostScript 3 and PCL. The standard Command Workstation® software provides an intuitive graphical user interface for managing jobs, print queues and workflows from a centralized location, and the Hot Folders option enhances productivity by automating job submission and helps reduce setup errors. Additional advanced software includes FreeForm™ (standard) and EFI Impose (optional).

**EFI MicroPress**
For large production environments, the EFI® MicroPress Server (optional) delivers true multi-engine clustering of up to 12 imageRUNNER 7105/7095/7086 devices at their maximum rated speed. Designed to manage every aspect of the pre-press to finishing production process, the MicroPress server includes industry leading tools to automate document creation, manage collation and finishing, and overcome print errors across multiple engines—all from an intuitive WYSIWYG, drag-and-drop interface.

The MicroPress server simplifies the task of printing jobs that contain both color and monochrome pages when used with a Color imageRUNNER C5185 Series device. Color output from the Color imageRUNNER device can be placed into the insertion unit of an imageRUNNER 7105/7095/7086 device to complete the workflow through its powerful collating and finishing capabilities.

** Check with your Authorized Canon Dealer for availability of ImageWARE Prepress Manager and ImageWARE Print Job Manager.**
Canon provides all the tools you need for a complete, easy-to-use, in-house document production system!

**Publish Professional-Looking Documents**

Build complex documents in a simple drag-and-drop environment with Canon’s powerful imageWARE Prepress Manager software. This optional desktop publishing utility simplifies the production of professional-looking documents containing various inserts or chapters from multiple files. Merge, edit, or reassemble content from several sources such as manuals, presentations, brochures, proposals, and catalogs into a single, cohesive document—even combine documents created in different applications.

The imageWARE Prepress Manager software option completes the digital workflow by driving all the advanced finishing options of the imageRUNNER 7105/7095/7086 devices. The all-in-one application features a highly intuitive make-ready interface and professional functionality such as perfect bind support, advanced imposition options, spine editing, creep correction, content editing tools, and variable data printing.

*Check for availability of JDF workflow support.*

---

**Print Controller Options**

**Multi-PDL Print Kit**  
High-volume office printing option:

- Canon UFR II, PCL, and PS Emulation Support
- JDF Workflow Support through imageWARE Prepress Manager option and job hold function
- Canon imageWARE Print Job Manager to manage multiple jobs

**imagePASS**  
Print server for light-production environments:

- Genuine PostScript 3™ and PCL 5e/6 Support
- Command Workstation to centrally manage jobs
- Hot folders, FreeForm™ and EFI Impose options

**EFI MicroPress**  
True multi-engine connectivity and clustering:

- Up to 12 imageRUNNER 7105/7095/7086 devices
- Up to 5 color imageRUNNER C5185 Series devices

---

* Check for availability of JDF workflow support.
BOOST YOUR EFFICIENCY

The imageRUNNER 7105/7095/7086 devices offer a host of document reproduction and storage features to ensure that every job is produced on time, every time.

To make the production of complicated documents manageable, users can combine different sets of documents into one with Job Block Combination at the device. Each set can be configured to run with unique settings, such as paper type and size, finishing, color, and more, then tested with the Sample Set feature or stored in a Mail Box for later use. Offset-stack document sets in groups can also speed preparation for off-line finishing or packaging. From the desktop, individual or groups of pages in documents can be configured with the new Exceptional Settings tab* in the print driver to control output settings such as media type, paper size, input tray and finishing options.

COMMUNICATE WITH EASE

Canon’s Universal Send technology enables you to distribute scanned documents to multiple network destinations—such as e-mail and Internet fax addresses, local Mail Boxes, network folders, and document management systems—in one simple operation. Help prevent impersonation or interception of information with the Digital Device Signature and Digital User Signature options, which verify a document’s source and its sender. Documents can be password protected with 128-bit AES encryption using the optional Encrypted PDF feature. And to locate the documents you need quickly and easily, you can also create searchable PDF files.

RETRIEVE INFORMATION ANYTIME

Transform your imageRUNNER system into an on-site information retrieval kiosk with the optional Web Access function. Navigate Internet or intranet pages right from the color LCD panel to locate and output desired forms or documents, without the need for a PC.

* Only available with PostScript 3 Emulation.
SIMPLIFY INSTALLATION AND INTEGRATION
Through a comprehensive suite of Canon-supplied software utilities, the Canon imageRUNNER 7105/7095/7086 devices answer the call for solutions that are easy to install, can seamlessly integrate with existing network management applications, and allow for monitoring and device control from anywhere on the network.

Canon’s imageWARE Enterprise Management Console (EMC) is a Web-based utility that simplifies and centralizes device installation and management, whether you’re supporting a single system or a fleet of networked devices. Administrators can also easily replicate settings and Address Books across multiple devices through the Device Information Delivery Function (DIDF). With Remote UI (User Interface), end-users can check device status and configuration before initiating a job for more informed printing decisions.

REDUCE USER ADMINISTRATION
Administrators have a choice of methods to control access and privileges to imageRUNNER 7105/7095/7086 devices, including Single Sign-On (SSO) using network accounts, Simple Device Log-In (SDL), and Department ID Mode with optional Control Card/Card Reader system. Using the Access Management System option, administrators also have powerful control over access to the device and its functions at both the user- and group-level for even greater security and cost control.

TIGHTEN YOUR NETWORK SECURITY
Beyond user-level authentication, network access to the device can also be restricted to specific IP/MAC addresses or ranges. With the Encrypted Secured Print option, all print data sent over the network is encrypted and password-protected at the device. Once the correct password has been entered, it will be printed and immediately deleted.

PROTECT YOUR SENSITIVE DATA
Protect your imageRUNNER 7105/7095/7086 device with advanced features that guard against unauthorized data access. To protect your stored, scanned, and printed data, the HDD Data Erase Kit automatically overwrites previously stored data. The HDD Data Encryption option provides additional security by encrypting data before it is written to the hard disk drive, and has achieved EAL3 Common Criteria (CC) certification. You can even embed secure watermarks that appear when unauthorized copies are made to help prevent leaks of confidential information.
MEET UNIQUE WORKFLOWS
Based on Java technology, Canon MEAP® (Multifunctional Embedded Application Platform) architecture allows the system to incorporate unique applications that run embedded within the device. The result is total integration into your company’s infrastructure by presenting customized applications to walk-up users directly from the imageRUNNER 7105/7095/7086 systems’ color LCD panel.

EQUAL ACCESS FOR ALL
The imageRUNNER 7105/7095/7086 devices go even further to provide easy system access to every authorized user. Disabled employees can operate system functions from a laptop or desktop PC using the optional Remote Operator’s Software Kit that emulates the control panel; visually impaired users can receive audible job confirmation via the optional Voice Guidance Kit.

IMAGE OF A LEADER
As a leading producer of network-connected multifunction devices, Canon continues to set new standards for quality, performance, and reliability. That’s why businesses of every size and scope trust Canon to provide industry-leading solutions that enhance productivity and make every business more productive.
### Main Unit

| Type: Digital Multifunctional Imaging System |
| Imaging System: Laser Dry Electrostatic Transfer |
| Developing System: Dry Monocomponent Toner Projection |
| Main Unit CPU: Dual Canon Custom Processors |
| Interface Connection: 10/100Base-TX (RJ-45), Hi-Speed USB 2.0 |
| Image Server Memory: Standard 1GB RAM + 40GB HDD |
| Max. Mail Boxes Supported: 100 (Max. Page Capacity: Approximately 20,000 pages) |
| Max. Copier Reservation: 20 Jobs |

### Duplex Automatic Document Feeder (imageRUNNER 7086)

| Tray Capacity: 100 Sheets |
| Scanning Speed: 65 Sheets Per Minute (Letter) |
| Acceptable Original Sizes: Statement to 11" x 17" |
| Acceptable Paper Weight: 13 lb. to 32 lb. Bond |

### Optional Accessories

#### Paper Deck-W1/Paper Deck-X1

| Paper Capacity: 3,500 Sheets |
| Number of Drawers: 1 |
| Acceptable Paper Weight: 17 lb. Bond to 110 lb. Index |
| Acceptable Paper Size: Letter |

#### Perfect Binder-A1*

| Binding Method: Perfect Binding |
| Cutting Method: Stack Rotation 3-Direction, or 1-Direction (for Open Edge) Cut |

**Duplexing:**
- Standard Automatic Trayless Duplexing
- 256-Level Grayscale Exposure Control: Automatic or Manual (Text, Photo, or Text/Photo)

#### Copy Speed

| Main Unit: 2.15kW |
| Plug: NEMA 6-15R |

### Optional Paper Supply: 3,500 Sheets

#### Duplex Automatic Document Feeder (imageRUNNER 7085/7095)

| Tray Capacity: 100 Sheets |
| Scanning Speed: 85 Sheets Per Minute (Letter) |
| Acceptable Original Sizes: Statement to 11" x 17" |
| Acceptable Paper Weight: 13 lb. Bond to 80 lb. Cover |

### Specifications (continued on back cover.)
